

## CHS Goals for 2014-15

### 1. **Collaboration – with a Focus on Assessment**

If we work together to use effective common assessments to determine what our students know, then we will improve instruction, student learning, and the quality and consistency of our classes.

### 2. **College and Career Readiness**

If we create opportunities, systems, and learning experiences that intentionally develop and support our students' readiness skills, then our students will be prepared for limitless college and career options.

### 3. **Student Growth**

If we focus instruction, measure student learning, and use student learning data to make decisions about instructional practice, then we will promote meaningful student growth around critical content and skills.

### 4. **CHS Vision**

If we align our efforts with our commitments, then we will make the CHS Vision a reality.
